

## HUNOR T. CSÁSZÁR

### FRONTEND DEVELOPER WITH UI/UX BACKGROUND

Frontend focused web developer with 7+ years of experience building and maintaining enterprise-level web applications.

Strong background in JavaScript, HTML, and CSS, with extensive experience working on Liferay-based platforms in international team environments. Comfortable collaborating with designers and backend developers to implement clean, usable user interfaces. Design background provides strong UI awareness and attention to detail.

## SKILLS

**Frontend** JavaScript (ES6+) | HTML5, CSS3 (SASS) | Responsive layouts  
Basic React (components, hooks) | Cross-browser UI implementation  
**Platforms | Backend** Liferay | Java | REST APIs | WordPress  
**Development Workflows** Git (feature branches, code reviews)  
CI/CD pipelines (existing setups) | Agile / Scrum collaboration  
**Design** Figma | Wireframing & prototyping | UI design systems

## PROFESSIONAL EXPERIENCE

### Frontend Developer

#### Webtown 2018 - 2025

- Frontend development on enterprise-level web applications using JavaScript, HTML5, CSS3, and the Liferay platform
- Implemented UI components, layouts, forms, and interactive elements based on design specifications
- Worked closely with backend developers, designers, and QA teams in international environments
- Participated in feature and platform design discussions for systems involving complex roles, permissions, and workflows
- Worked on large-scale corporate and public-sector portals with high usability and accessibility requirements

#### Projects:

- Arabic Academy of Saudi Arabia - website redesign and event platform
- KBC Ireland bank - frontend implementation and cloud migration
- Red Sea Global - frontend codebase integration
- UNIQA, A1, MSCI, Vigadó, AJBH, MATE, BMLV - enterprise and public sector portal projects

### Graphic Designer

#### Codecool 2015 - 2017

Designed digital and print marketing materials, branding assets in collaboration with marketing team

#### Freelance Designer 2011 - 2015

Digital illustrations using Adobe Illustrator, Photoshop and InDesign

## PROJECTS

### L2ENERGY

- Designed branding and website UI, and implemented the frontend using WordPress

### Budgeting App (Hobby Project)

- Designed and implemented a small React-based budgeting application
- Used React components, hooks, and basic state management
- Focused on practicing component-based UI development in React
